DISPLAY IMAGE QUALITY

AutoChimp™ Pro Series cameras support HD CVBS output (NTSC / PAL).
Final on-screen image quality depends on the display's supported video
format and resolution.

Pro Series cameras provide a clear image in both daytime and low-light conditions.

Example shown on 70 Series and N80 Hilux factory displays.

The OEM Toyota stereos are not AHD – their format is CVBS (NTSC).

PRO SERIES CAMERA

Universal 6V-12V camera for front, rear and custom vehicle installations.

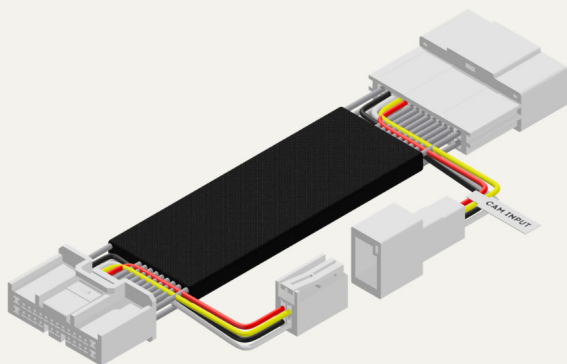

Suitable for compatible Toyota factory screen systems, AutoChimp™ camera interfaces and RCA camera setups.

Modular adjustable mounting brackets allow grille, bumper, tray, canopy or custom mounting.

DIMENSIONS

Adapter Harness

Cables Length: 120mm
Overall Length: 180mm

4 Pin Connector

Width: 11mm
Height: 18mm

Width: 10mm
Height: 17mm

26 Pin Connector

Width: 39mm
Height: 14mm

Width: 36mm
Height: 10mm

COMPATIBLE VEHICLES

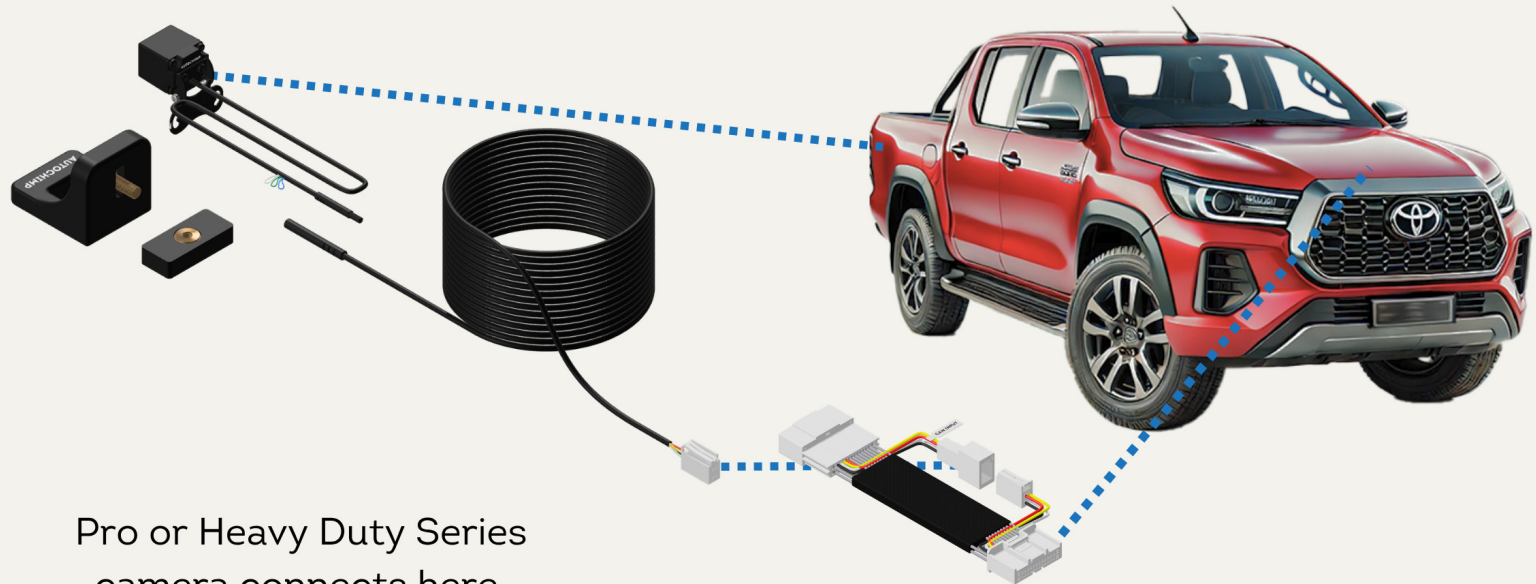

The AC-TOY-26PIN plugs into the factory 26-pin camera port at the passenger-side kick panel and carries the camera video through to the factory screen. It fits the Toyota Hilux 2020–2025 with the factory screen shown below.

Supports both Auto & Manual Transmission Vehicles.
Supports all variants such as Workmate, SR, SR5...etc
Suits vehicles with either 12V or 48V electrical systems.

HOW IT WORKS

The AC-TOY-26PIN harness is built to allow simple camera connection to the factory screen using the OEM plugs on the vehicle. It T-pieces inline and allows you to add either an AutoChimp™ Pro Series or Heavy Duty Series camera – completely plug & play and fully reversible.

Pro or Heavy Duty Series
camera connects here.
Simple plug & play
installation.

Note: AC-TOY-26PIN installs into the
passenger kick panel.

CAMERA FEATURES

Configurable Camera Display

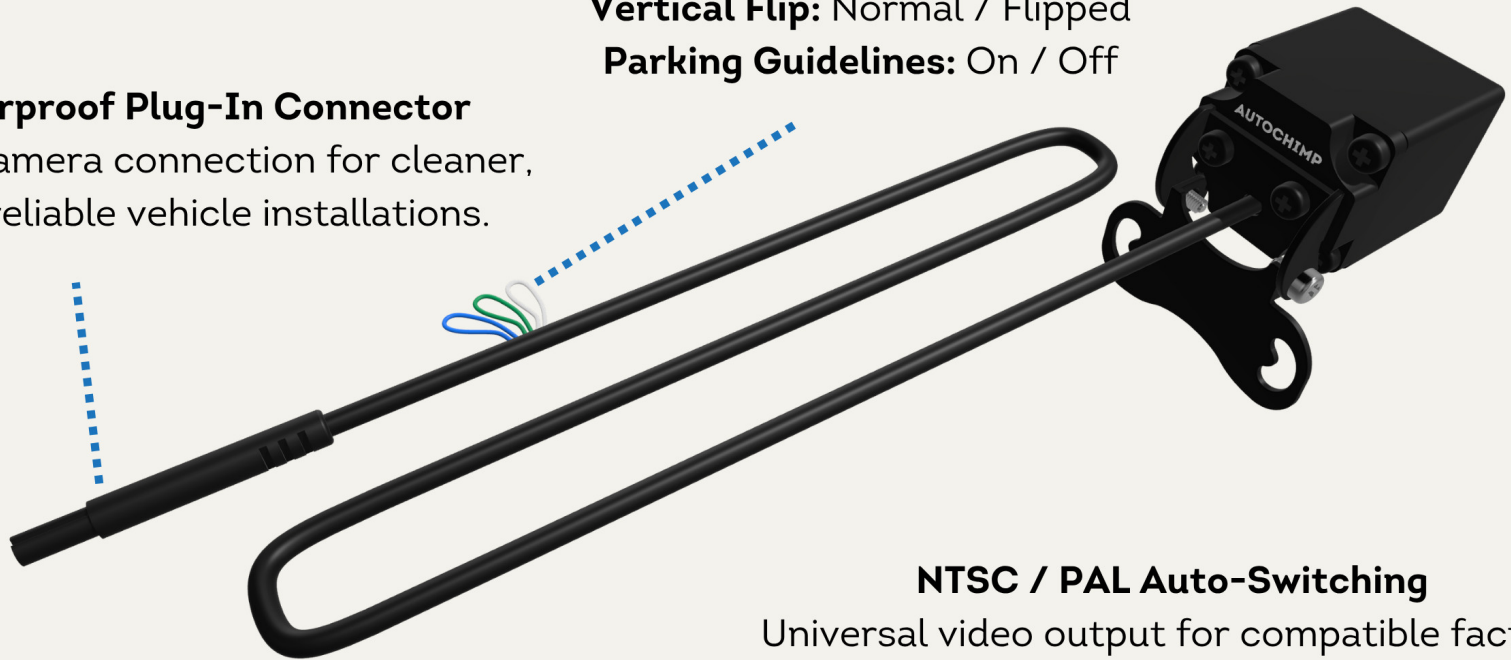

Horizontal Flip: Mirror / Non-Mirror

Vertical Flip: Normal / Flipped

Parking Guidelines: On / Off

Waterproof Plug-In Connector

Sealed camera connection for cleaner, more reliable vehicle installations.

NTSC / PAL Auto-Switching

Universal video output for compatible factory screens and RCA display systems.

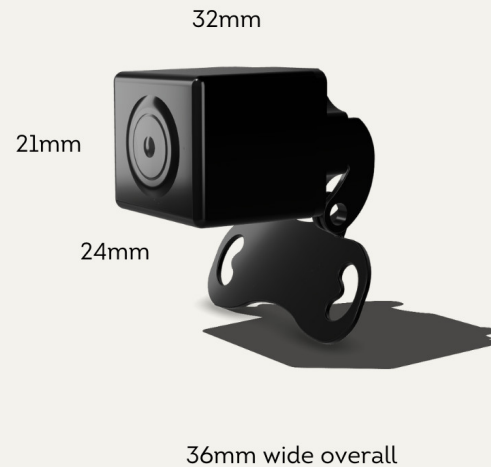

6V-12V Compatible

Ready for compatible Toyota factory screen systems, AutoChimp interfaces and RCA camera setups.

WHAT'S INCLUDED

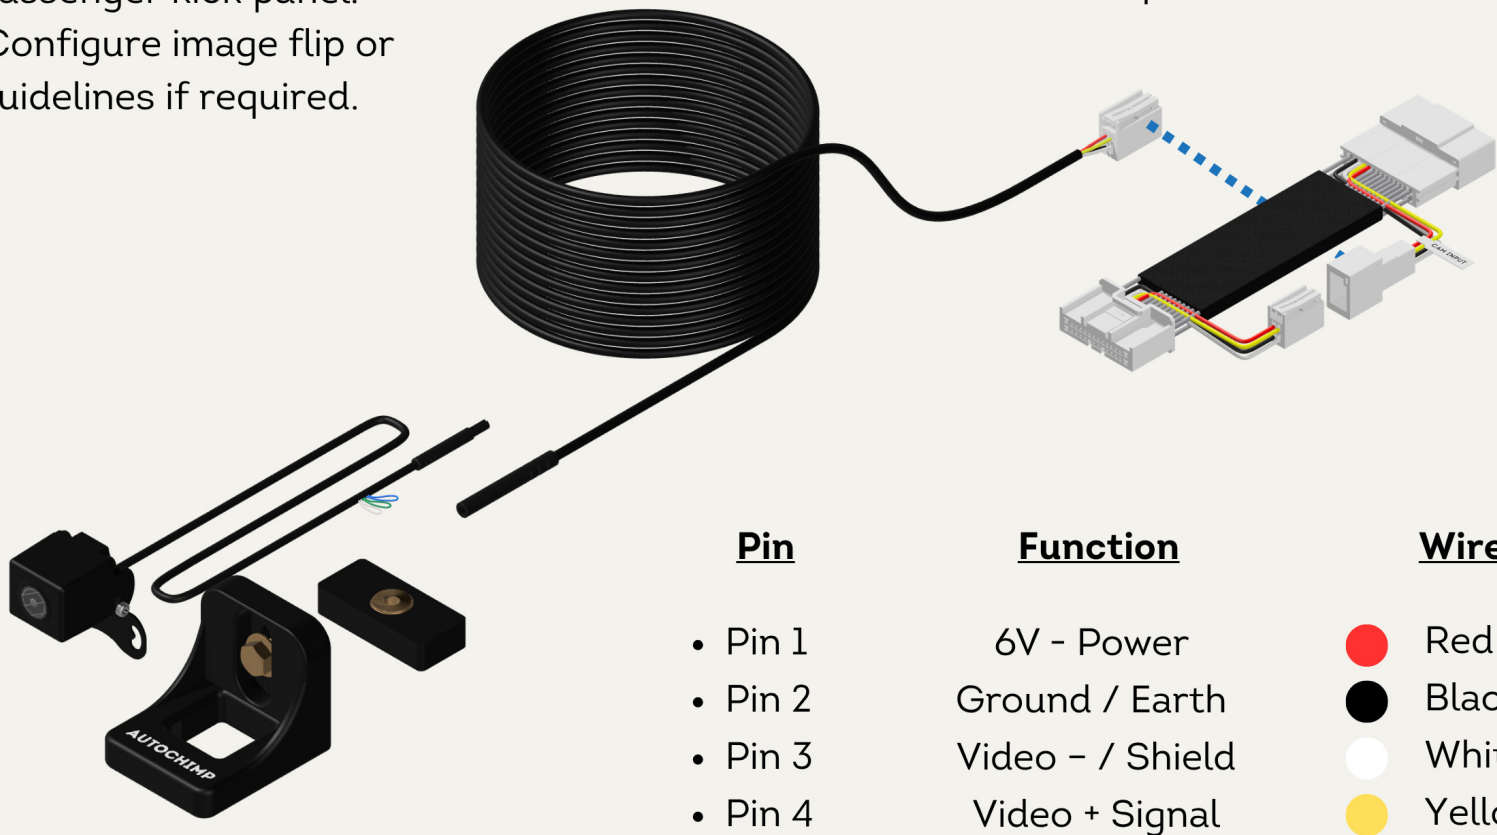

SKU: AC-TOY-RC6

QUICK START GUIDE

1. Mount the camera.
2. Route the camera cable.
3. Connect the adapter in passenger kick panel.
4. Configure image flip or guidelines if required.

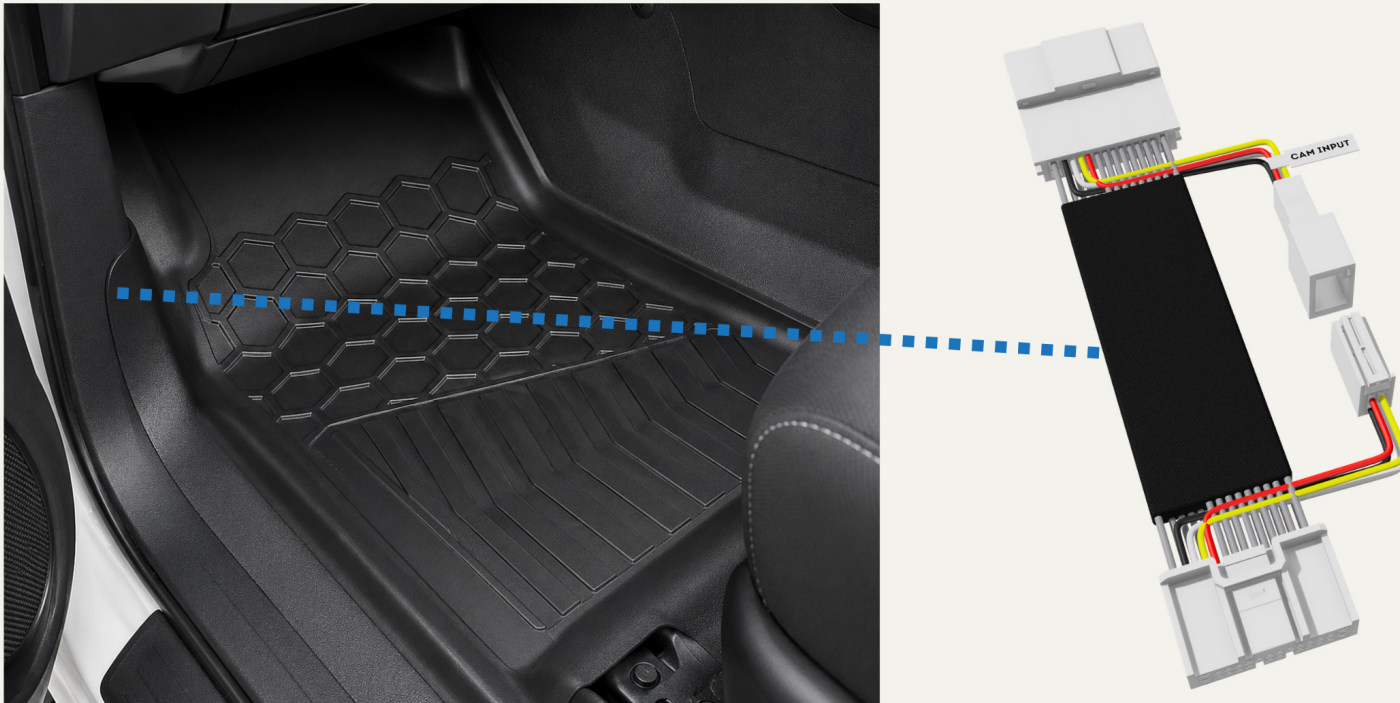

Camera connects to adapter.
Adapter installs in **PASSENGER**
kick panel.

INSTALL GUIDE

LOCATION: PASSENGER KICK PANEL

The Toyota Hilux 2020 - 2025 models have factory camera wiring already run to the passenger's kick panel. Remove the kick panel cover. Insert the AC-TOY-26PIN interface harness inline. Plug the camera into the labelled CAM INPUT 4-pin connector.

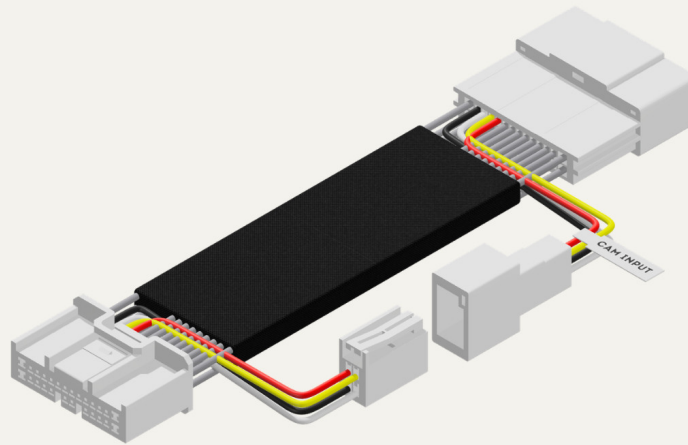

CAR SPECIFIC WIRING

The AC-TOY-26PIN is a plug-and-play reverse camera interface harness for the factory 26-pin camera port in the Toyota Hilux.

Suits Hilux 2020-2025 (N80 series).

26-Pin Full Pass-Through Camera Input Harness

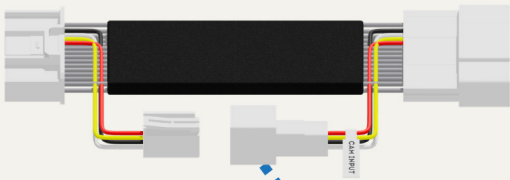

Installs at the passenger-side kick panel and provides a 4-pin camera input with full factory pass-through, the same as our other adapters.

The two-piece connector design lets you change the camera later without removing the harness.

SKU: AC-TOY-26PIN

FITMENT GUIDE

AutoChimp™ HD Pro Camera connects directly to AutoChimp™ Camera Adapter Harness. Use either option depending on your model vehicle.

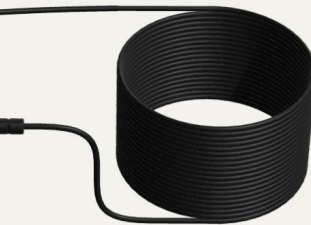

AC-TOY-26PIN ~ Install passenger kick panel

Note: Pass-through connector – not used with a camera fitted.

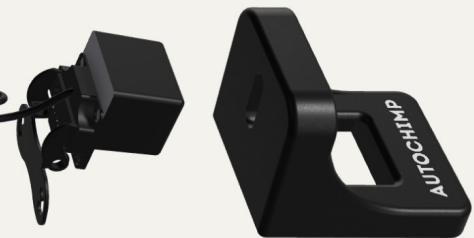

Extension Cable
8m

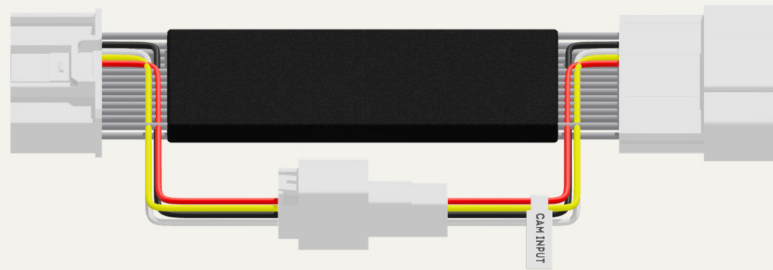

Power Cable
1m

Power / Video Cable
7m

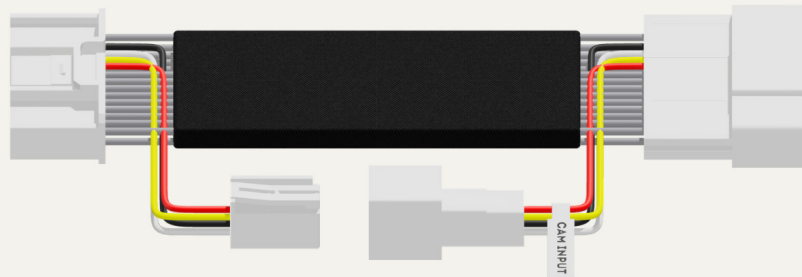

FULL PASS-THROUGH

All 26 factory pins carry straight through the harness, so every OEM circuit stays connected. Only the camera video circuits break out to the 4-pin plug pair.

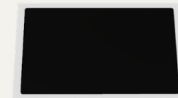

Closed – 4-pin plugs joined together, factory pass-through fully restored.

Open – 4-pin plugs separated, camera connects to the labelled CAM INPUT.

MOUNTING REAR CAMERA

Pro series camera can screw into rear of the mounting bracket or can mount stand alone.

Use sealing tape or rubber grommets where cables pass through panels or floor sections.

Extension & power cable runs from rear to front to **PASSENGER** kick panel and into the patch Interface Harness.

Configure the camera for correct orientation. See camera config page.

MODULAR CAMERA MOUNTING SYSTEM

Multi-Directional Mounting

The camera can be used as a front, rear, side, tray, canopy or custom vehicle camera. It can be mounted directly in its metal housing or paired with AutoChimp™ mounting brackets.

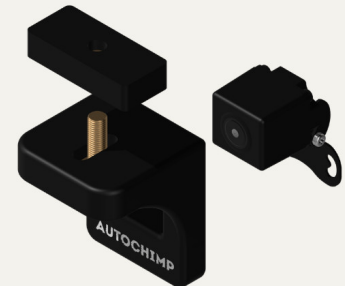

Alternative ABS-GF Mounting Brackets Available

Rear + Tray Mounts

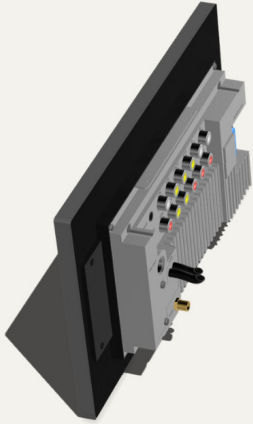

Front Camera Mounts

Universal Rear Mounts

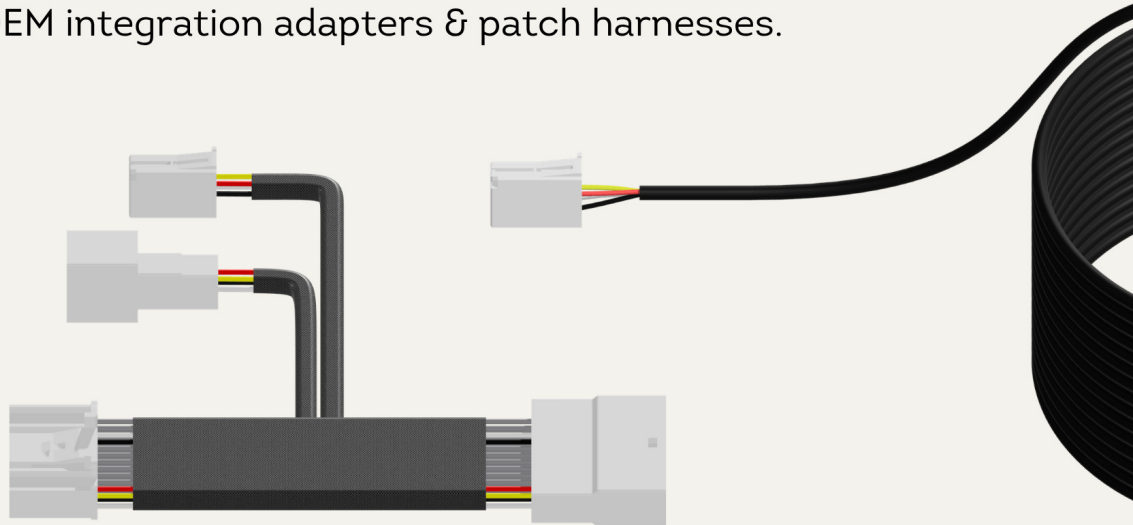

CAMERA INTERFACING

The AutoChimp™ Adapters can be used for direct connection to AutoChimp™ Dual + Quad Camera systems and are a universal connection to stereos & screens with composite video input.

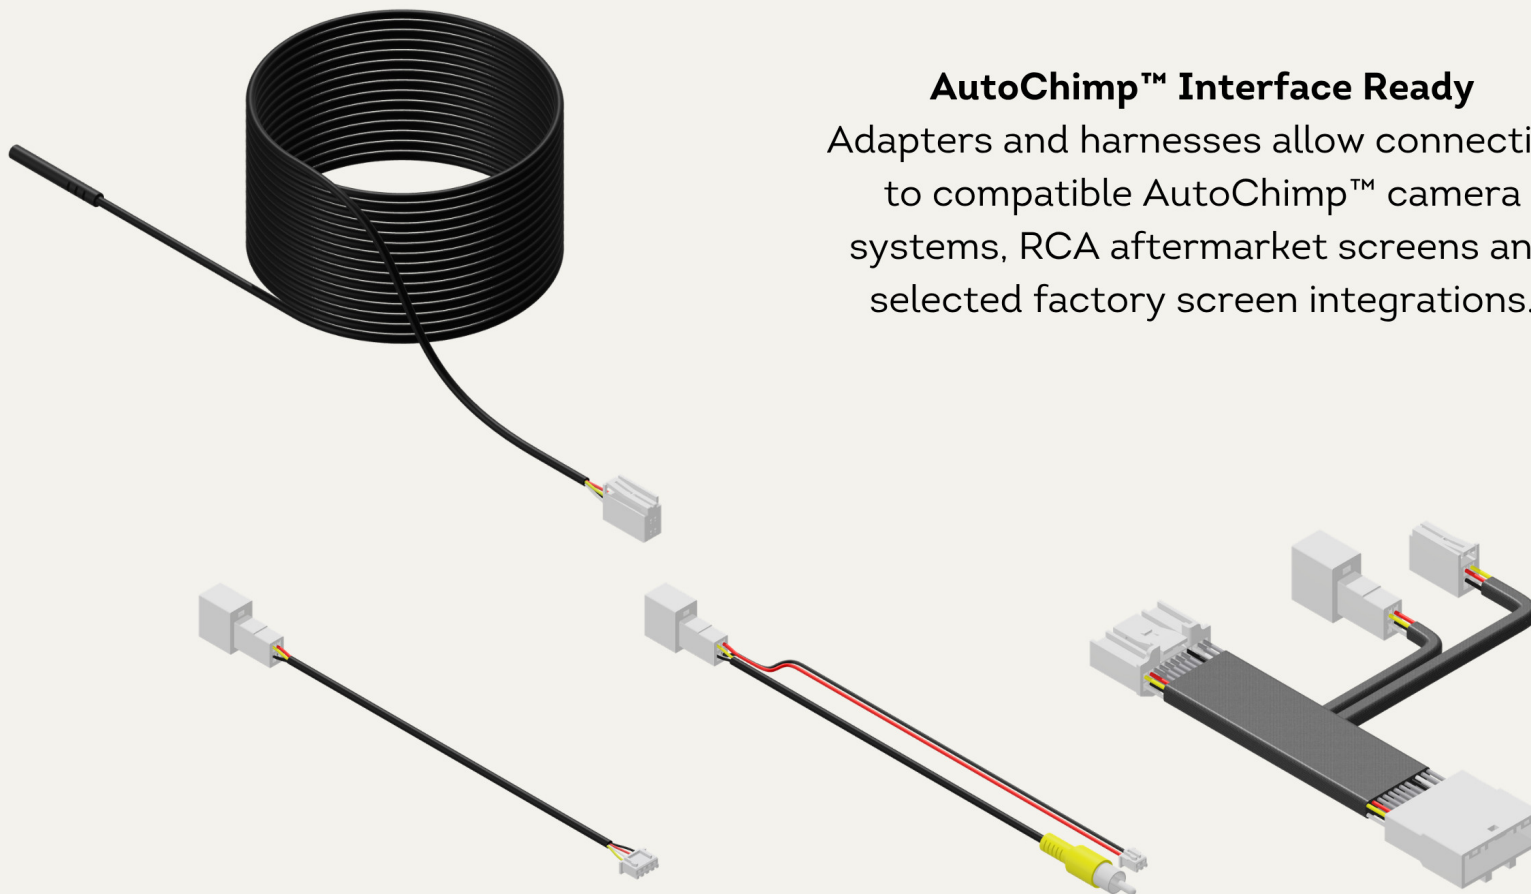

AutoChimp™ cameras can also be connected directly to factory Toyota screens or through our OEM integration adapters & patch harnesses.

CAMERA CONNECTION

AutoChimp™ Interface Ready

Adapters and harnesses allow connection to compatible AutoChimp™ camera systems, RCA aftermarket screens and selected factory screen integrations.

(Adapters sold separately or included in kits as specified)

CAMERA SETUP

PRO SERIES CAMERAS

Three loop wires set the camera output. **Cut a loop to switch that option; rejoin it to switch back.** Test the picture before you seal the cable.

White — Mirror / Non-Mirror

Joined = mirror (rear), cut = non-mirror (front). Switches between rear-view and front-view orientation.

Blue — Vertical Flip

Joined = normal, cut = flipped. Corrects the image when the camera is mounted upside down.

Green — Parking Guidelines

Joined = on, cut = off. Turns the on-screen guidelines on or off.
